CAPABILITY STATEMENT

Taber International, LLC provides consulting and system development services to commercial and government clients with fully customized smart automation, optimization, and process control solutions. Our mission is to enable clients to achieve their maximum potential through holistic system enhancements and applied data intelligence.

CORE COMPETENCIES

- Theoretical Understanding of Systems
- Technical & Hands-On Experience with functioning, closed-loop systems
- Proficient Computing Expertise
- Rapid Solution Development
- Experience with multiple computing languages – Python, MATLAB, R, etc.
- Versatile and customized solution development approach integrates seamlessly with diverse processes & dynamic environments

CORPORATE EXPERIENCE

PACIFICORP · Ameren MISSOURI · TransAlta · SRP · TALEN ENERGY · PRAIRIE STATE Energy Campus · Colbun

NAICS CODES

541614 – Process, Physical Distribution and Logistics Consulting Services

541330 – Engineering Services

541511 – Custom Computer Programming Services

541690 – Other Scientific and Technical Consulting Services

DIFFERENTIATORS

- 100% Repeat Clients
- Combined artificial intelligence and expert knowledge implementation strategy generates effective, process-guided synergies
- Advanced union of analysis and synthesis approaches result in holistic solutions and benefits
- Deployments are specially configured to be self-learning and adaptive, automatically adjusting to real-time process evolution
- Working experience with substantial processes (e.g., furnaces, boilers, cooling towers, mills, pulverizers, rotating equipment, pumps, etc.)
